ABOUT US

Esmak Makine is an international trading company focused on the automotive industry based in Turkey. one of its main field of operation is the global procurement of raw material, components, and consumables for the automotive production process, spare parts for the after sales service, equipment for service workshop and engineering.

We are offering a whole range components for the bus industry and commercial vehicle assembly as interior trim, exterior trim, mechanical, electrical components. Esmak Makine's procurement mission is to achieve the lowest overall cost for the goods, ensure that they meet the required quantity of goods at worldwide locations in time.

Fully experienced in managing international sales operations from market research to pricing and from advertising to logistics. Esmak makine is a partner that will satisfy all of its customers and supplier network. Esmak makine is also engaged in domestic and international trading of various products such as machinery, metals, minerals and chemicals, as well as providing services in logistics and construction.
